Safari testing wasn't possible on my computer as it is no longer support on Windows. Instead I used this site below, which didn't produce the most amazing video but it does highlight that the JS still works on Safari.
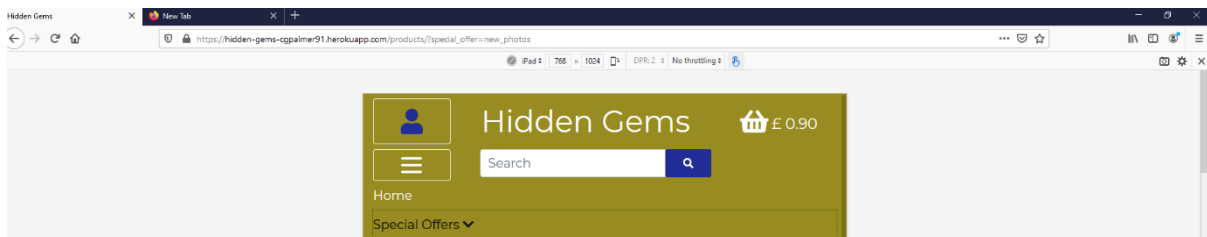

My website relies on very few animations or custom classes and they worked on Safari. It isn't the best video but it shows the JS works.

https://app.crossbrowsertesting.com/public/i147117e453833d3/livetests/58110531/videos/z08c8f3978626a12ef38?test_hash=1f8172e8

1. When in focus the mobile nav should look like this:

Instead it looks like this:

Fix:
